Runs / shop-api-142-1 · Checkout fails when coupon and gift card are combined

● running ⓘ conductor/shop-api-142 started 13:41 · 21 min

Open issue

Abort

● head ● worker · pricing ● worker · tests

IS Issue

When a customer applies a coupon and pays part with a gift card, the coupon discount is subtracted twice and the order total goes negative.

> Thought, read 3 files, ran 1 command38s

AG Agent

The discount is applied in Pricing.total/1 and again in Checkout.apply_gift_card/2. I added a failing test that reproduces it, then removed the second subtraction.

>_ bash mix test test/shop/checkout_test.exs ● exit 0

Running ExUnit with seed: 40213, max_cases: 16

Runs / shop-api-139-1 · Add rate limiting to the public search endpoint

● waiting for input ⓘ conductor/shop-api-139 started 13:24 · 34 min

Open issue

Abort

● head ● worker · plug

IS

Issue

The public /search endpoint has no rate limit. One client sent 40,000 requests in a minute last week and slowed down checkout.

>

Thought, read 4 files, ran 2 commands

52s

AG

Agent

There is no rate limiter in the app yet. I added a token-bucket plug backed by ETS and put it in the :api pipeline for /search only.

>_

bash mix test test/shop_web/plugs/rate_limit_test.exs

● exit 0

.....

Finished in 0.2 seconds

6 tests, 0 failures

AG

Agent

The limit works. Before I choose what it counts on, I need one decision from you.

💬 The agent asks · 14:02

Should the limit apply per API key only, or per client IP for anonymous requests too?

Your answer

Answer

⚠️ Tests failed after 3 attempts.
mix test exited with status 2: InventorySyncTest "syncs stock after a partial shipment" timed out after 60000 ms.

● head

● worker · inventory

IS

Issue

InventorySyncTest fails on CI about one run in five. It never fails locally.

> Thought, read 5 files, ran 3 commands

1m 40s

AG

Agent

The test waits for a GenServer cast with Process.sleep(100). On a loaded runner the cast is not handled yet, so I replaced the sleep with :sys.get_state/1.

> bash mix test --repeat-until-failure 50 test/shop/inventory_sync_test.exs

● exit 2

.....

1) test syncs stock after a partial shipment (Shop.InventorySyncTest)

** (ExUnit.TimeoutError) test timed out after 60000ms
